

PROJECT PLANNING &SCHEDULING

DATE	
TEAM ID	LTVIP2025TMID30762
PROJECT NAME	CALCULATING FAMILY EXPENSES USING SERVICENOW

Assigned Task to the Group members as a shown in below.

Functional requirement	User story	No of Activity	Team Members
Setting up servicenow instance	A user story for setting up a ServiceNow instance focuses on the process of requesting and accessing a personal developer	1	B.Mahalaxmi

	instance (PDI) on the ServiceNow Developer Site. It details the steps involved, from signing in to receiving the instance details		
Creation of new update set	A user story for creating a new Update Set in ServiceNow might be: "As a developer, I want to create a new Update Set so I can group and move my customizations from a development instance to a test instance	1	B.Mahalaxmi
Creation of Table	As a developer, I want to create a new table to store specific data related to a new feature, so that I can properly manage and report on this data within the platform."	4	B.Bujji
Creation of Table(Family expenses)	As a user, I want to be able to track my daily expenses, so that I can manage my budget and easily submit expense reports."	4	B.Bujji
Creation of relationship	As a Change Manager, I want to be able to see all	1	B.pravallika

	associated Change Tasks related to a specific Change Request, so I can easily track the progress of the overall change."		
Configuring related list on family expenses	As a user, I want to see a related list of all family expenses associated with a specific household on the household form, so I can easily view and manage all related financial transactions in one place."	1	B.Mahalaxmi
Creation of Business rules	As a system administrator, I want a business rule to automatically set the priority of an incident to 'High' when the impact is 'High' and the urgency is 'High', so that critical incidents are handled with priority."	1	B.pravallika
Configure the relationship	As a Configuration Manager, I want to define and configure relationships between CIs (e.g., Applications and Servers) in the CMDB,	1	B.pravallika

	So that I can understand dependencies and improve impact analysis and change management
